

PALOMAR MEDICAL CENTER
Escondido, North County San Diego, California

>> **GLOBECON:** Last Man Standing at \$550 Million San Diego Hospital Project

GlobeCon was awarded a trucking and logistics contract for the Palomar Medical Center.

The 740,000 square foot facility opened in 2012 and was one of the country's largest hospital construction projects.

“GlobeCon did a great job for us on the Palomar Hospital project. While the other trucking providers had serious challenges meeting delivery windows at the construction site... **GlobeCon was on time, every time.**”

RASMUS DIXEN, EXECUTIVE SALES MANAGER
DSV AIR & SEA, INC.

The Palomar project required the ability to make time-critical set appointment deliveries to the construction site because late deliveries resulted in significant penalties for the contractor.

The contractor had labor crews standing by waiting for the trucks carrying building materials to arrive to the site, making it vital to the project's success that **all appointment times were met with precision.**

At the onset of the project there were **5 trucking companies** providing services, but by the end of the nine-month project, **GlobeCon remained as the only provider left** standing because we were the only provider who **made every delivery ON time for the entirety of the project.**
